## **DETAILED ACTION**

## Allowable Subject Matter

1. Claims 1-22 are allowed.

- 2. The following is an examiner's statement of reasons for allowance:
- 3. Claims 1, 9, and 16 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose <u>a method</u> for supporting mobility in a wireless communication system having. A mobile unit selects an first access point candidate within the same network as the currently serving access point with the best connection attributes and compares said first access point candidate with a second access point from a different network having the best connection attributes in that network. The two candidate access points are compared and the mobile unit establishes a connection to the second access point if the comparison fulfills certain conditions. It is noted that the closest prior art, Belanger et al (US 5,785,186) discloses the use of selecting access points based on a comparison of signal quality between the currently serving access point and a candidate access point, but fails to compare an access point candidate with best connection attributes from a first network to an access point candidate with best connection attributes from a second network.

## Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 09/785,567 Page 3

Art Unit: 2662

The following patent is cited to show the state of the art with respect to the selection of access points or roaming based on improved signal quality:

US Patent (6,791,959) to Palmer et al

US Patent (5,862,489) to Aalto

US Patent (6,332,077) to Wu et al

US Patent (6,144,855) to Slovin

US Patent (5,260,988) to Schellinger et al

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan Nguyen whose telephone number is 571-272-3089. The examiner can normally be reached on 9am-6pm ET, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9314.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
